DETAILED ACTION

Claim Objections

1. Claim 13 is objected to because of the following informalities: in claim 13, it appears that the claimed limitation "the mediums" as recited in line 12, and "the mixed media" as recited in line 16 appear to lack antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gettig 4,581,016 in view of Reynolds 4,886,495.

Gettig discloses a discharge device as seen in Figure 2, which comprises a main body (2), a media reservoir with at least two sealed media reservoir sections (7,12) positioned with respect to one another and including a sealing element (38) separating the reservoir sections, the media reservoir being at least enclosed in part by the main body as seen in Figure 2, a discharge opening (5) at a first end of the main body, a single stroke pump device (15,17) at least partially enclosed by the main body and projecting from a second end of the main body for applying a first linear force in a first direction to open the sealing element so that the mediums in the two media reservoir sections mix during a first mixing stage as seen in Figure 3, the single stroke pump

device for applying a second linear force in the first direction during a second discharge stage to discharge the mixed media from the discharge opening (col. 4, ll. 47-68 onto col. 5, ll. 1-9). Gettig lacks that the media reservoir sections rigidly with respect to one another. Reynolds teaches the use of two sealed media reservoir sections (6,10,14) positioned rigidly with respect to one another (col. 3, ll. 23-38 and in col. 6, ll. 14-43).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize Reynolds' teaching onto Gettig's device by having the media section (7) made of glass, as taught by Reynolds in (col. 3, ll. 23-38 and in col. 47-68), in order to provide a transparent media reservoir section so that the user can view the level of the mixed products.

Allowable Subject Matter

4. Claims 1-10,12 are allowed.
5. Claims 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 2/22/2005 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
